

Tauranga Waterfront Project

Client: Tauranga City Council

Tauranga City Council's Strand Waterfront Redevelopment aims to redevelop the city centre waterfront area by creating a multi-purpose public open space for recreation, leisure, outdoor events and play spaces. Ryder Consulting managed the applications for Resource Consent. Management also included the coordination of technical experts, and delivery of an extensive consultation strategy. In addition we prepared an Assessment of Environmental Effects (AEE) report, and consulted with submitters to resolve potential issues. We also prepared and presented planning evidence before a hearing panel of three independent commissioners.
